Product Characteristic Curve

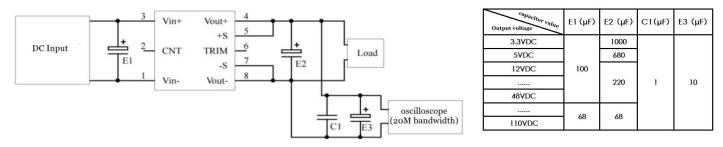

Note:

1. Both the temperature derating curve and the efficiency curve are tested with typical values;

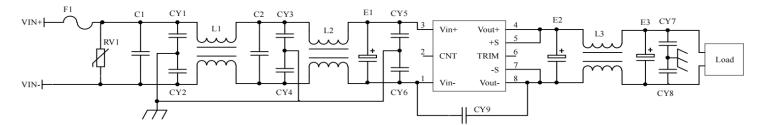

2. The temperature derating curve is tested according to our laboratory test conditions. If the actual environmental conditions used by customers are inconsistent, it is necessary to ensure that the temperature of the aluminum casing of the product does not exceed 100°C, and it can be used within any rated load range.

All DC/DC converters of this series are tested according to the test circuit recommended in the following figure before leaving the factory.

1. Recommended application circuit

If customer does not use the circuit recommended by our company, please be sure to connect an electrolytic capacitor of at least 100 µF in parallel at the input end to suppress the possible surge voltage at the input end.

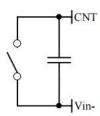

F1	T20A/250Vac fusing			
RV1	14D 100V Varistor			
C1,C2	105/250V Polyester film Capacitor

3. Sense usage and precautions

(1) Without far-end

compensation:

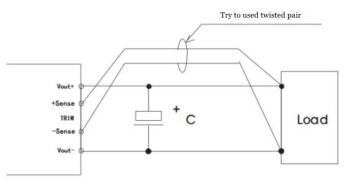

Precautions:

- 1. Do not use remote compensation, make sure Vout+ and Sense+, Vout- and Sense- are short-circuited;
- 2. The connection between Vout+ and Sense+, Vout- and Sense- should be as short as possible and close to the pins, otherwise the module may become unstable.

(2) Using remote

compensation

Precautions:

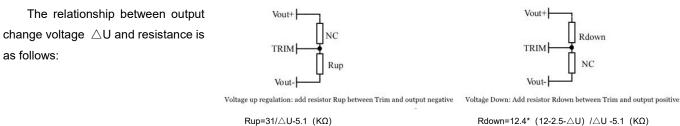

1. When the long-end compensation lead is used, the output voltage may be unstable;

2. If remote compensation is used, please use twisted pair or shielded wire, and keep the lead wire as short as possible;

3. Please use wide PCB leads or thick wires between the power module and the load, and keep the line voltage drop below 0.3V to ensure that the power output voltage remains within the specified range;

4. The impedance of the leads may cause the output voltage to oscillate or have larger ripples. Please verify it before use.

4. Use of TRIM and calculation of TRIM resistance

5. This product does not support the use of direct parallel connection to increase the power. If you need to use it in parallel, please consult our technical staff.
